I have great pleasure in writing this testimonial in favour of Affordable Solar Energy. After sending for information I was quickly contacted by the Company offering an information interview. This was so effective that I looked no further for a supplier and ordered the fitting of equipment on the spot.

The information given by the representative was very accurate - not overstated and important. For example the quality of product, the guarantee system, the timetable for completion of job, sensible statement of units produced.

Everything that we planned happened to time and on date planned. The staff were excellent, courteous and helpful.

The completion was within 8 hours to a high standard of workmanship.

Since fitting we seem to have averaged an average of 10 units generated - remembering this period July to September.

I would have no hesitation ~~to~~ in recommending this company and the products they use.

I. Appleyard
