Affordable Solar Energy,  
Dear Sirs,

We chose to use your company on the recommendation of satisfied friends in Shropshire, who had had your panels fitted for a year already.

The whole process from my first phone call to installation was quite short, and we knew what to expect at each stage, because of the information given. Tara at the office was very helpful on the phone, and everyone who came here, from the Marketing Consultant to the scaffolders, was polite and did their respective jobs well.

A month ago 22 panels were fitted to our south facing roof, and we have been lucky so far to have plenty of sunshine in the southeast. It is interesting to consult the portable meter and check the production score. We have in response changed the timing of several domestic tasks eg the dishwasher now runs at lunchtime, not in the evening to use the "free electricity". This is very satisfying with rising electricity prices!

Altogether we are pleased with the investment we have made, and look forward to seeing how the returns pan out over the next 12 months. With the stock market so shaky at present, I cannot see that we can lose.

Yours sincerely,

  
John and Kathleen
