

McCullum.

Having previously contacted another Solar Energy Company, who left me with only a price and phone number, I decided to contact Affordable Solar Energy.

From that initial contact I have found every one at Affordable very friendly, helpful and thorough and they provided literature and brochures which enabled me to make an informed choice of installer.

The Sales Manager explained everything, the Surveyor discussed

the exact positioning of the panels etc. and the installation team worked efficiently, left no mess, and explained the whole system on completion.

I am very happy to be benefitting from the new system and would recommend Affordable Solar ~~Eng~~ Energy to everyone.
