Dear Sir
Reference to our Order Number

Our PV 3Kw system that you supplied and fitted has been running for a few weeks. We are so pleased with the whole process and the quality of the installation that we felt compelled to write to you.

Right from the time that your representatives visited our bungalow to explain what you could offer to suit our needs, through to the final installation, the process was smooth and easy.

We were kept informed at all stages of the short process and we were even able to have the system fitted at a time we requested to suit our holiday from work.

We have read a lot of reports on the internet and the more we read the more we are pleased to have chosen Affordable. The information you gave us appears to be spot on without any exaggeration or enhancement.

The surveyor and the fitters were prompt arriving and did everything we asked of them to suit our layout and our needs.

We have had a number of people ask us about the system and all have been impressed!

We are proud to be able to say that we are helping in a small way to save the planet.

Thank you Affordable!

Yours Sincerely

J. E. and A. M.
