AFFORDABLE SOLAR ENERGY

From the very outset we found the "Affordable" team to be very professional. Initially the scheme was explained clearly and we were left with enough material to make a decision and the contacts for help if needed. The survey and the installation were completed efficiently and on schedule. We found the team to be amenable and flexible over payment which was very helpful. Because of this we feel any after service that may be required will be equally good.

A handwritten signature in blue ink, appearing to read 'P. Burton', is written over a printed name.

Burton
