Dear Sir,

I am prompted to write to you to congratulate you on the excellent service that we have received from your company.

My wife and I had decided to install a photovoltaic system on our roof and the question arose; who was the best company in a rapidly growing market to handle our installation. Having done some homework and research, a telephone call from one of your agents led to an appointment for a salesman from ASE to call.

He confirmed what we suspected - that our roof's angle, aspect and site was ideal for a 4 Kw system and it wasn't long before a price had been agreed. A mere four weeks later and the system is installed and ~~pro~~ generating.

Throughout the process, all the staff and contractors involved were polite, helpful and efficient. Also my queries to your head office were answered politely and efficiently by Tava.

Affordable Solar Energy as a company will obviously play a big role in the rapid rise in popularity of solar energy systems. As such it will play its part in the contribution of renewable energy sources to reduce our carbon footprint and our reliance on fossil fuels.

Thank you for an excellent service

Yours faithfully

Tandy

Tim
