HAMPSHIRE,

GU.

4<sup>th</sup> May 2011.

Dear Sirs,

We decided to install PV panels based on a combination of the index linked feed-in tariffs and our wish to reduce our carbon footprint.

Throughout the whole process of sales, survey and installation everyone has been courteous and questions have been answered promptly. The installation of a 3.96kWp system took less than a day and has resulted in a very tidy installation.

Since the panels have been in place the weather has been exceptionally good and this has been reflected in the high levels of electricity generated, well in excess of the predicted figures.

We have been delighted with the whole process and would thoroughly recommend Affordable Solar Energy.

LA Weber

Mr & Mrs. ROBERTS,
