Customer Number

Affordable Solar Energy LTD.

Dear Sirs,

LETTER OF TESTIMONY

We recently selected Affordable Solar Energy as our supplier of choice having previously made up our minds to install solar panel to generate electricity.

The financial gains of solar panels were clear to us and the "Green" element of helping to save the planet by reducing the carbon footprint were compelling. So we took the initiative and asked six solar energy panel companies to help us choose the best overall solution for our home.

The solution we looked for included the elements of

- a cost vs benefits analysis, i.e. spend against return.
- a flexible technical solution to suit our home while still being aesthetically pleasing.
- clear explanations of the various processes, from the sales presentation to having the system up and running.
- clarity of explanation and politeness of people visiting our home.
- openness in answering any challenging questions that may arise.

It is only fair to say that not only did Affordable Solar Energy come out top in every individual aspect of our choice but they maintained a high professional standard throughout.

Five out of the six companies did respond to our invitation to visit and quote and only two made anything like a respectable presentation during their visits. Some representatives arrived late, other came on the wrong day. After Affordable's first visit they shot to top place in our estimation and stayed there.

Armed with four written quotations we sat down and studied exactly what was offered; including warranty periods, time scales to start and also to complete the installation. Affordable was a clear winner.

The solar panels and associated equipment and cabling have now all been installed and we are generating power. Our daily readings already indicate that we have made excellent choice to have solar panels and to have chosen Affordable's total solution.

Yours faithfully
