Dear Affordable Energy.

I would just like to thank you all very much for the wonderful experience of the installation of my new Photovoltaic Solar System.

From the initial visit to the installation everybody was polite, informative and professional. I can't stop singing your praises. I get a real buzz when I look at the meter

and see the number of units of electricity going up on a daily basis, knowing that my fuel bills have been reduced.

I absolutely love my new panels. Thank you very much Affordable.

Yours faithfully
