To whom it may concern,

Re: Customer Order Number - 6428.

Following the installation of our Affordable Solar Energy System in October, we are writing to outline our experience of the installation of the system.

We were particularly impressed by the high level of professionalism and expertise demonstrated by the installation engineers - and by how tidy they were!!

We look forward to having "free" hot water and are very pleased to have been able to experience Affordable Solar Energy,

Yours Faithfully,

J.E.A.
