Affordable.Solar Energy Ltd

Dear Sirs

Customer Order

I am writing as requested to comment upon the installation of my solar water heating system.

On the initial arrival of the installation crew I was surprised by the size of the external 'housing' which was the size of a small shed. Due to the nature of the premises, being a Park Home (mobile), this would have had to be installed with a sizable gap between it and the property to allow maintenance access.

Fortunately the manager of the crew recognised the problem with this and agreed to source suitable equipment which could be installed beneath the property.

This was done and the installation then proceeded in a prompt and professional manner.

The crew were extremely pleasant and courteous and did an excellent job, particularly considered the cramped nature of the installation beneath the property.

I am pleased with the neat arrangement of the completed equipment and have noticed immediate benefits with the hot water system (a 'Combi' boiler) since the installation, although the time of year precludes full benefits being realised.

I would have no difficulty in recommending Affordable Solar Energy Ltd to others.

Yours Faithfully,

P.J.
