Affordable Solar Energy

17th July 2010

Dear Sir,

We had our solar energy panels installed 2 weeks ago and are writing to thank you for the way in which the work was carried out and successfully completed.

Already we are amazed at the amount of free energy our system is producing and are looking forward to our first cheque from our energy supplier!

We chose to have the advanced solar system installed as we already have free hot water from an existing system. This is truly making our home into a 'green house' – and we feel proud that we are now on the way to becoming 80% sustainable for all our energy needs. We can even power an 'electric' bike and commute to work for free.

This is now an integral part of the fabric of our house, enabling us to contribute to a healthier, greener world. With the added bonus of 'free energy' and also being paid, you can truly 'beat the system'. No tax to pay, just extra income. An excellent solution for every householder.

Yours sincerely,

David and Frances
