I chose solar Energy because as a tourism enterprise it is important to me to not only have 'Green Credentials' but to be saving on energy bills. In achieving both these aims through Solar Panels I am also investing in the future for my children and Grandchildren.

I hope to be able to encourage all who visit my home, in this stunning county of Herefordshire, to consider the future of the environment and potentially consider solar panels or other 'Green alternative ways of living'.

The benefits will hopefully be two fold in the energy generated by the sun into the property giving a return on my investment and customers reducing/or offsetting their carbon footprint by staying with us and thereby increasing our bed night income.
