2011

Dear Sir / Madam,

Having just had our solar

panels installed on our home we look forward to not only our first cheque from the kWh that have been obtained by installing the system but also the hope that we might have helped in reducing the amount of electricity that is manufactured normally by coal or other carbon based products.

Affordable solar energy have.

installed a system that we hope will be  
an asset to us & others at the same  
time.

Affordable have done a very good  
job up to now & we look forward to  
having a good relationship with them  
in the coming years.

Yours faithfully
